Instructions for Use

Mixing

Weigh 10 parts of A to 1 part of B. The mixing container should be 4 to 5 times larger than the volume of silicone. Using clean tools thoroughly mix the A and B components. Air entrapped during mixing should be removed using vacuum equipment capable of achieving a vacuum of 29 inches of mercury.

Storage and Shelf Life

QSil 216 should be stored in the original unopened container at 25C (77F). It will remain useful for a period of 12 months if stored under those conditions.
